CHEMICAL GEOLOGY

OFFICIAL JOURNAL OF THE EUROPEAN ASSOCIATION FOR GEOCHEMISTRY

VOLUME 61 NO. 1/4 **CONTENTS** **MARCH 25, 1987**

(Abstracted/indexed in: *Bull. Signal., Chem. Abstr., Curr. Contents, Geo Abstr., Geosci. Contents, Am. Geol. Inst. Bibliogr. Index Geol.*, and *Mineral. Abstr.*)

Special Issue *"Current Research on Fluid Inclusions, ECRFI, Göttingen, April 10–12, 1985"*, by E.E. HORN and H.-J. BEHR (Guest-Editors)

Preface, by E.E. Horn and H.-J. Behr (Guest-Editors) vii

Analysis of volatiles in fluid inclusions by mass spectrometry
D.I. Norman (Socorro, N.M., U.S.A.) and F.J. Sawkins (Minneapolis, Minn., U.S.A.) 1

The application of a multichannel laser Raman microprobe (Microdil-*28*®) to the analysis of fluid inclusions
E.A.J. Burke and W.J. Lustenhouwer (Amsterdam, The Netherlands) 11

Measurements of the phase transformation temperature of gypsum–anhydrite, included in quartz, by microthermometry and Raman microprobe techniques
C. Kosztolanyi (Vandoeuvre-lès-Nancy, France), J. Mullis (Fribourg, Switzerland) and M. Weidmann (Lausanne, Switzerland) 19

Investigations of individual fluid inclusions with the Heidelberg proton microprobe — A nondestructive analytical method
E.E. Horn (Göttingen, Federal Republic of Germany) and K. Traxel (Heidelberg, Federal Republic of Germany) 29

A new approach to fluid inclusion decrepitometry — Practice
G. Hladky and R.W.T. Wilkins (North Ryde, N.S.W., Australia) 37

Deformation of fluid inclusions in fluorite under confining pressure
N. Guilhaumou, R. Couty and R. Dahan (Paris, France) 47

Experimental determination of isochores for 30-wt.% $MgCl_2$ solutions
Mia Moers and R. Kreulen (Utrecht, The Netherlands) 55

Thermodynamic calculations of the C–O–H system applied to fluid inclusions: Are fluid inclusions unbiassed samples of ancient fluids?
R. Kreulen (Utrecht, The Netherlands) 59

Inclusions of sedimentary brines in post-Variscan mineralizations in the Federal Republic of Germany — A study by neutron activation analysis
H.-J. Behr and J. Gerler (Göttingen, Federal Republic of Germany) 65

Composition of fluid inclusions in Permian salt beds, Palo Duro Basin, Texas, U.S.A.
E. Roedder, W.M. d'Angelo, A.F. Dorrzapf, Jr. and P.J. Aruscavage (Reston, Va., U.S.A.) 79

H_2S-bearing inclusions in recrystallized halite
Svetlana N. Grishina (Novosibirsk, U.S.S.R.) 91

Natural Na–K–Mg–Cl solutions and solid derivatives trapped in euhedral quartz from Danish Zechstein salt
J. Fabricius (Copenhagen, Denmark) 95

Pb–Zn mineralization associated with diapirism: Fluid inclusion and stable isotope (H, C, O) evidence for the origin and evolution of the fluids at Fedj-el-Adoum, Tunisia
A. Charef and S.M.F. Sheppard (Vandoeuvre, France) 113

Fluid systems in metaplaya sequences in the Damara Orogen (Namibia): evidence for sulfur-rich brines — General evolution and first results
A. Schmidt-Mumm, H.-J. Behr and E.E. Horn (Göttingen, Federal Republic of Germany) 135

Significance of fluid inclusions for determining the temperature gradients of hydrothermal solutions and their application to metallogenesis
V. Pomârleanu and Eleonora-Ana Neagu (Bucharest, Romania) 147

Correlation of homogenization temperatures of accessory minerals form sphalerite-bearing deposits and Ga/Ge model temperatures
P. Möller (Berlin, Federal Republic of Germany) 153

Fluid inclusions of the massive sulfide deposits in the Skellefte district, Sweden
C. Broman (Stockholm, Sweden) 161

(continued on the last page in this Special Issue)

CONTENTS *(continued from page 2 of the outside cover)*

Fluid inclusion studies in the polymetallic ores of Gyöngyösoroszi (north Hungary) — Spatial and temporal evolution of ore-forming fluids
I. Gatter (Budapest, Hungary) 169

Characteristics of fluid inclusions in the porphyry copper deposit at La Granja, Peru
U.F. Hein and M. Tistl (Berlin, Federal Republic of Germany) 183

Fluid inclusion study in different types of tin deposits associated with the Hercynian granites of western Spain
J. Mangas (Las Palmas, Spain) and A. Arribas (Salamanca, Spain) 193

Fluid inclusions in fluorite mineralizations of northwestern Sicily, Italy
Adriana Bellanca (Palermo, Italy), B. De Vivo (Rome, Italy), P. Lattanzi (Florence, Italy), A. Maiorani (Rome, Italy) and R. Neri (Palermo, Italy) 209

Fluid inclusions in quartz from a gold-mineralized granodioritic intrusion at Carlés, Asturias, Spain
A. Rua-Figueroa, M. Llavona, J. Loredo and J. García Iglesias (Oviedo, Spain) 217

Correlation between quartz crystal morphology and composition of fluid inclusions as inferred from fissures in central Slovakia (Czechoslovakia)
V. Hurai and V. Stresko (Bratislava, Czechoslovakia) 225

Evidence of fracturing and fluid movements in granite from Finnsjön, Sweden, derived from inclusions in fracture-filling calcite and prehnite
S. Lindblom (Stockholm, Sweden) 241

Effects of meteoric water interaction on Hercynian granites from the Südschwarzwald, southwest Germany
K. Simon and J. Hoefs (Göttingen, Federal Republic of Germany) 253

Salt-poor and salt-rich fluid inclusions in quartz from two boreholes in northern Switzerland
J. Mullis (Fribourg, Switzerland) and H.A. Stalder (Bern, Switzerland) 263

Fluid inclusion characteristics of the Variscan and post-Variscan mineralizing fluids in the Federal Republic of Germany
H.-J. Behr, E.E. Horn, K. Frentzel-Beyme and Chr. Reutel (Göttingen, Federal Republic of Germany) 273

Fluid inclusion study of epigenetic veinlets from the Carboniferous rocks of the Fore-Sudetic Monocline (southwest Poland)
S. Speczik and A. Kozlowski (Warsaw, Poland) 287

Chemical analyses and diffusion studies of gases in andesitic lavas: Arenal Volcano (Costa Rica)
J.L. Zimmermann (Vandoeuvre-lès-Nancy, France), J.L. Cheminée and H. Delorme (paris, France) 299

FORTHCOMING PAPERS

Preliminary fractionation patterns of ore metals through Earth history (G.H. Brimhall, Jr.)

Platinoid element Eh–pH diagrams (25 °C, 1 bar) in the system M–O–H–S with geochemical applications (D.G. Brookins)

The electrochemistry of colloidal particles from a proglacial lake (E. Bryant and D.J.A. Williams)

Bacteria as nucleation sites for authigenic minerals in a metal-contaminated lake sediment (F.G. Ferris, W.S. Fyfe and T.J. Beveridge)

Rare-earth element distributions in uraninites: implications for ore genesis (B.J. Fryer and R.P. Taylor)

Synthesis and distribution coefficient of low-magnesium calcites (M.R. Howson, A.D. Pethybridge and W.A. House)

The O, Sr, Nd and Pb isotope geochemistry of MORB (E. Ito, W.M. White and C. Göpel)

Major volatiles from a North Atlantic MORB glass and calibration to He: A size fraction analysis (A. Jambon and J.L. Zimmermann)

A practical method for the analysis of rare-earth elements in geological samples by graphite furnace atomic absorption and X-ray fluorescence (S.J. Juras, C.J. Hickson, S.J. Horsky, C.I. Godwin and W.H. Mathews)

Sediment chemistry of Kashmir Himalayan lakes (India), I. Clay mineralogy (R.A. Kango, K.P. Dubey and D.P. Zuthsi)

Quantification of uranium, thorium and gadolinium spectral interferences in instrumental activation analysis of samarium (S. Landsberger and A. Simsons)

A review of the use of loss-on-ignition as a measurement of total volatiles in whole-rock analysis (P.J. Lechler and M.O. Desilets)

A new explanation for cyclic deposition in marine evaporite basins: meteoric water input (M. Magaritz)

Cellular lepidocrocite precipitation and heavy-metal sorption in *Euglena* sp. (unicellular algae): implications for biomineralization (H. Mann, K. Tazaki, W.S. Fyfe, T.J. Beveridge and R. Humphrey)

Geochemistry of white micas from Portuguese tin and tungsten deposits (A.M.R. Neiva)

Enhanced $^{3}He/^{4}He$ ratios and cosmogenic helium in ultramafic xenoliths (D.R. Porcelli, J.O.H. Stone and R.K. O'Nions)

Calculation of calibration line parameters from reference material data in the analysis of silicate rocks: Theil's incomplete method compared with least-squared regression (P.J. Potts, D.W. Wright, J.S. Watson and P.C. Webb)

Effect of an igneous intrusion on oil shale at Rundle (Australia) (J.D. Saxby and L.C. Stephenson)
